

NARA's Electronic Records Archives Program

Briefing for Joint Staff and Combatant Commands

November 19, 2003

Ken Thibodeau

Director

ERA Program Management Office

NARA's Electronic Records Challenge

- Take any type of record,
- Created using any type of application,
- On any computing platform,
- From any entity in the Federal Government and any donor.
- Provide discovery and delivery to anyone with an interest and legal right of access,
- Now and for the life of the republic
- *Guide and assist other agencies in managing their records*
 - *For successful transition to e-government*

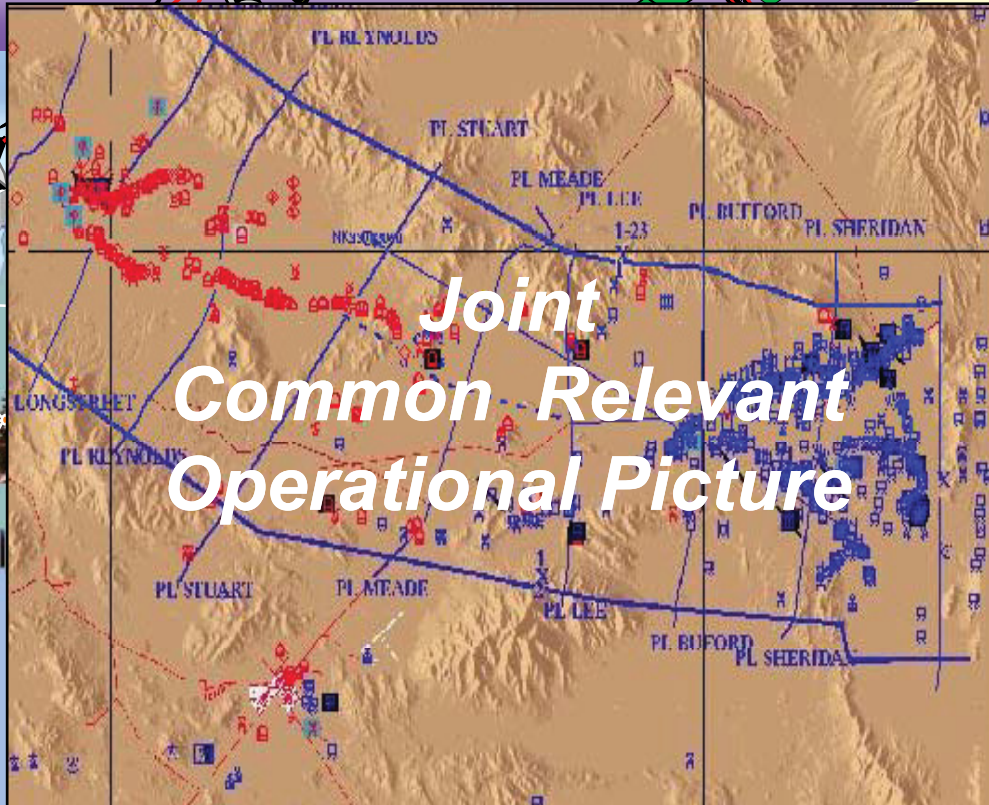

Exploiting the Enterprise

Bandwidth Expansion

Joint, Interagency, & Multi-National Interoperability

Employment (Operational Level)

Unit(s) of Action (Tactical Level)

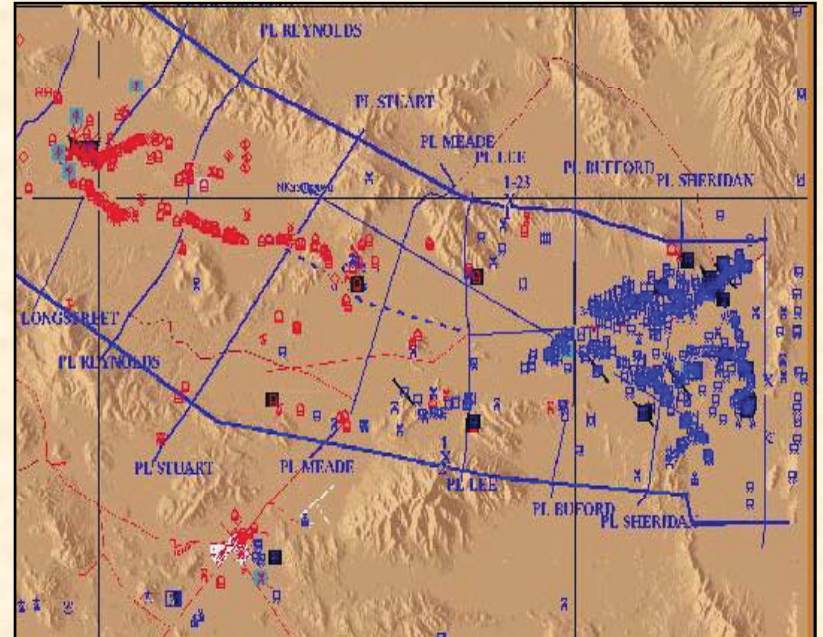

Unit of Employment (Tactical Level)

"Space to Mud"

"Factory to Foxhole"

A (Federal) Record?

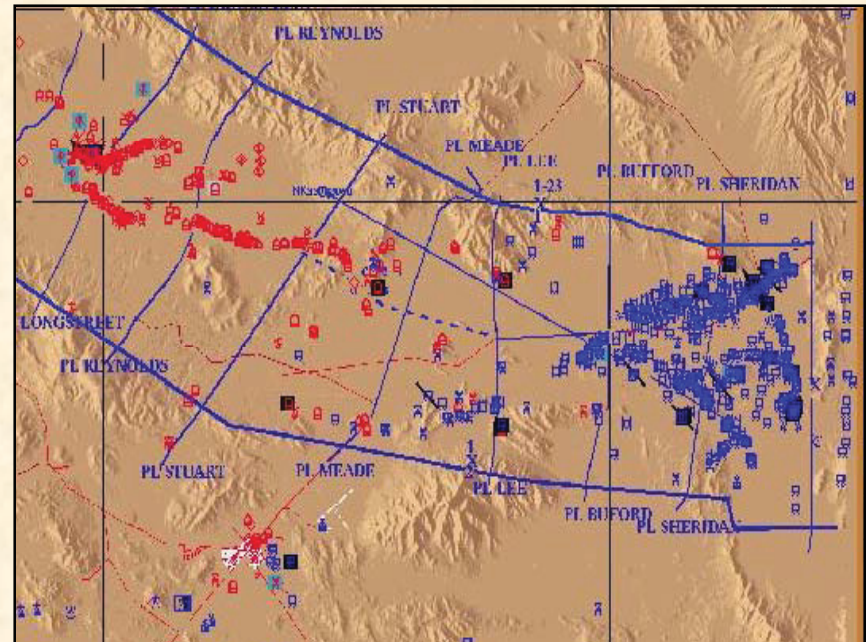

- ✓ Information made or received in the course of business
- ✓ Kept, or should be kept
 - ◆ As evidence of functions, organization, policies, decisions, actions, etc.
 - ◆ Because it contains valuable information
- ❖ Regardless of form or characteristics

- An electronic record is a record in a form suitable for processing by a computer

Does an Electronic Record Have to be Kept in Electronic Form?

- If there is no other way to keep it
- If there is a business need to do so
 - E.g., in order to continue to use it in the system in which it was created
- If the evidential or informational value would be diminished by converting it to another form.

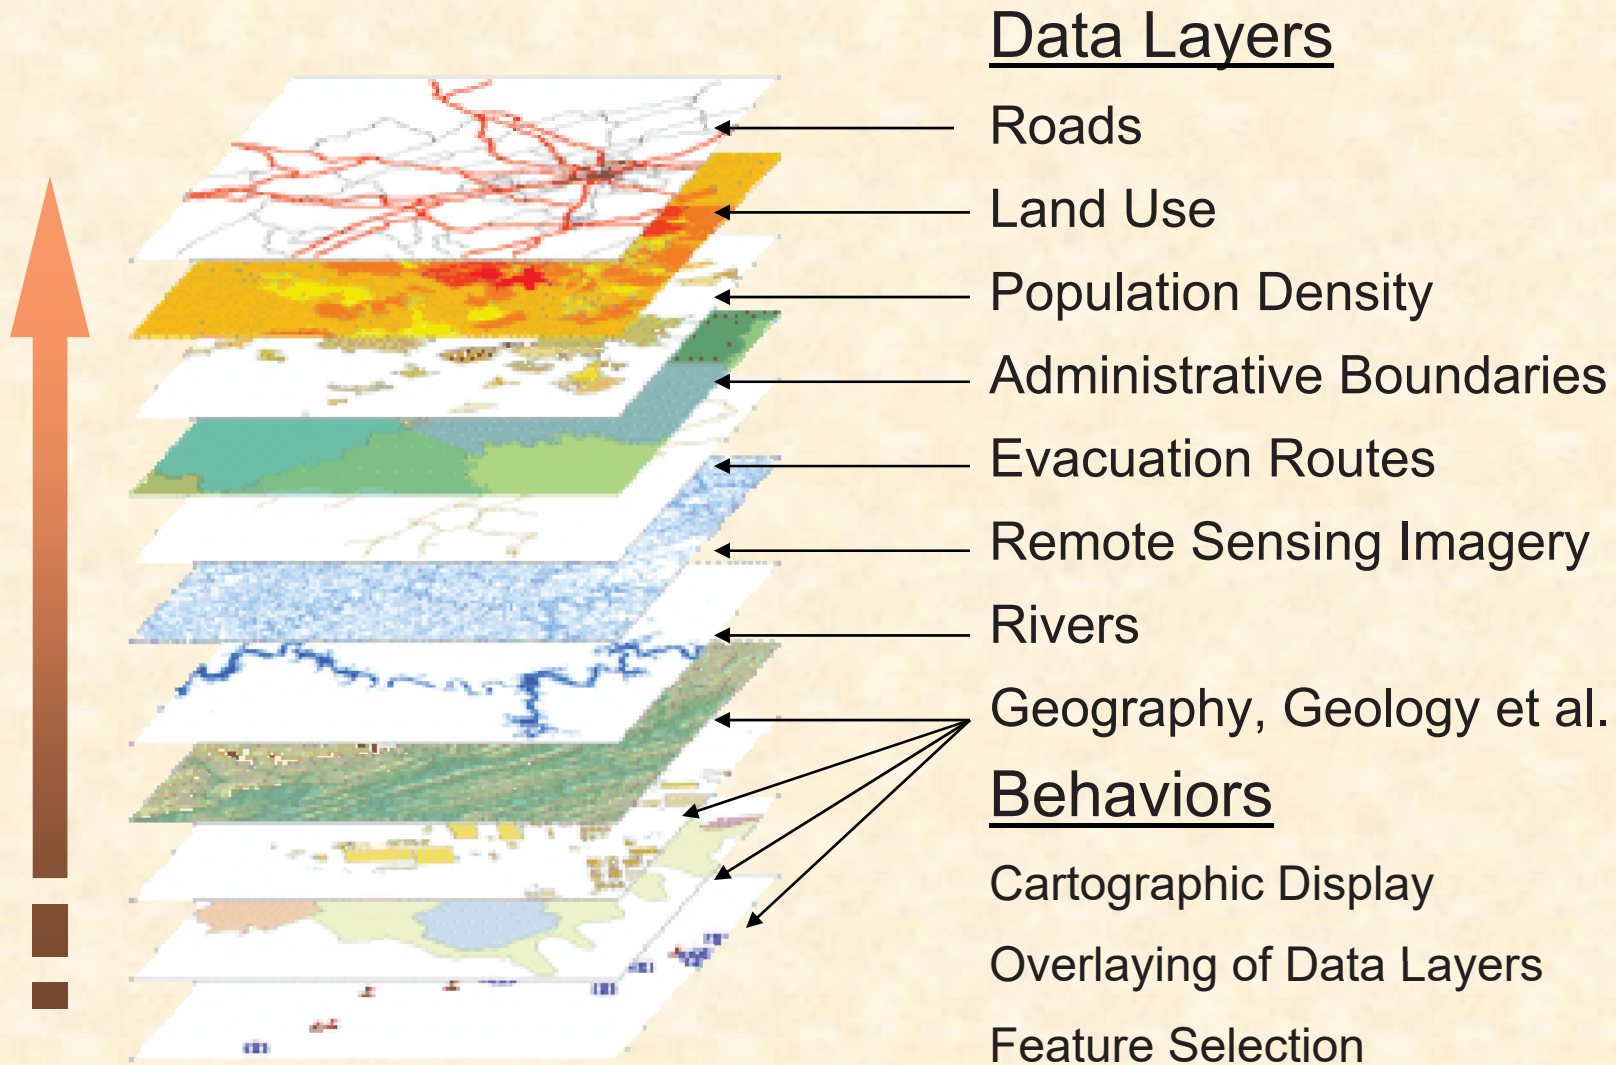

Keep a Record In Electronic Form
if it has essential properties
which cannot exist in any other form.

A Record in the Form of a Geographic Information System (GIS) Application

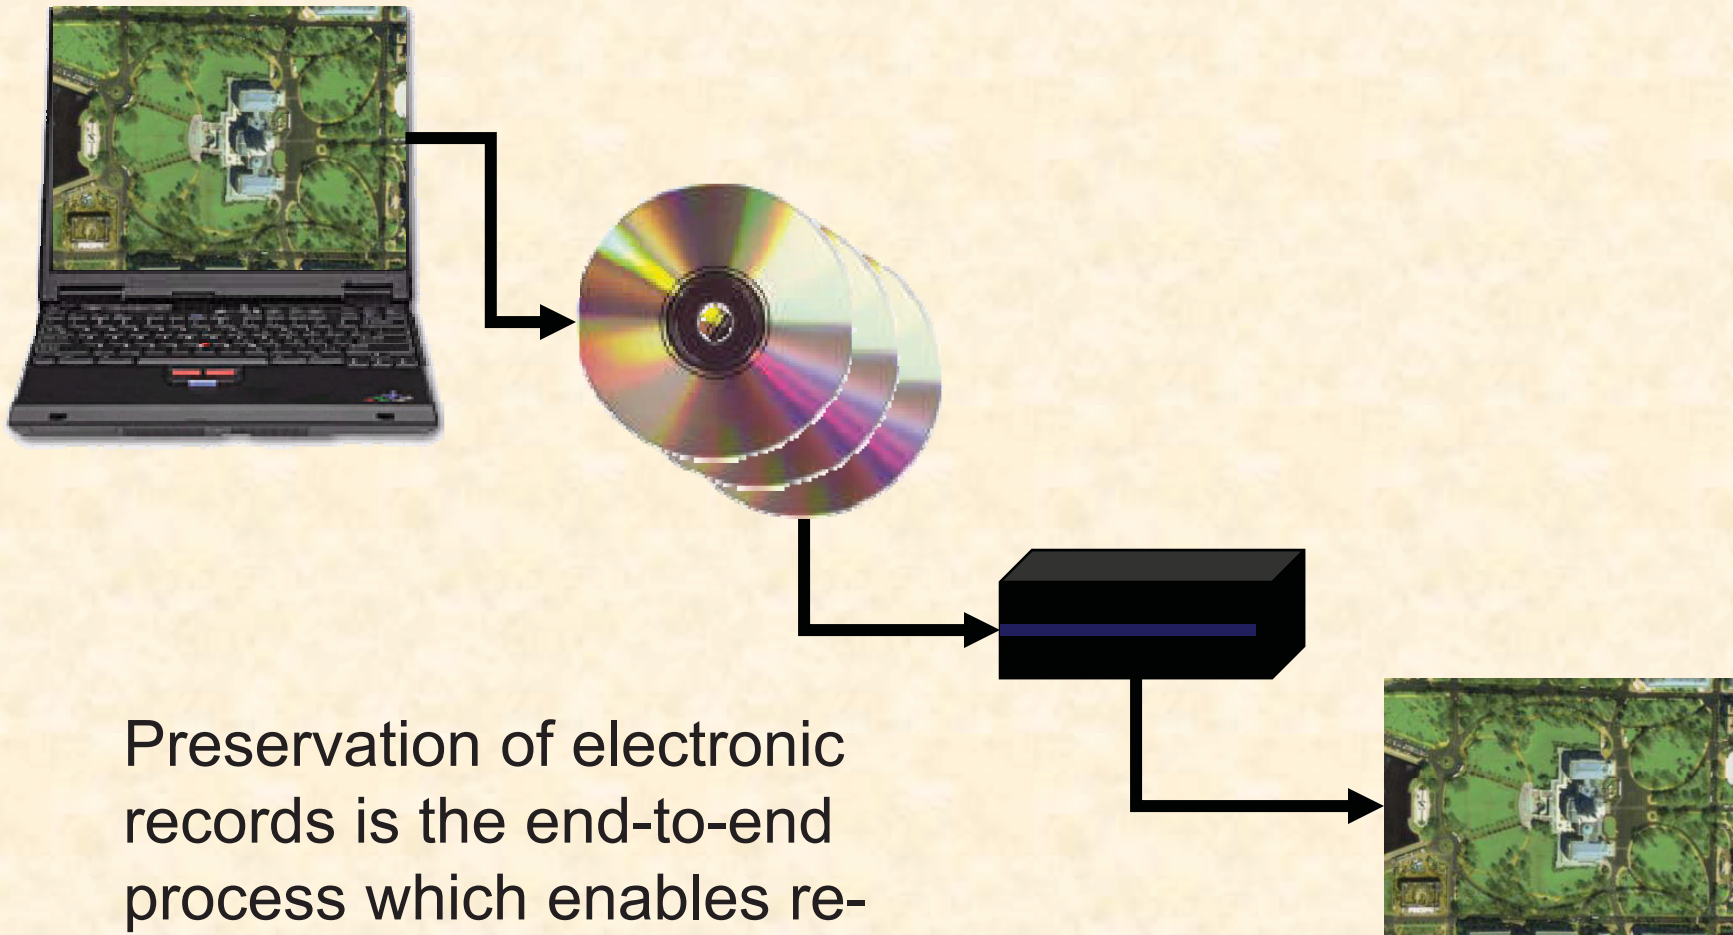

Enduring Values

- Evidence
 - Emphasis on Authenticity
 - Enhanced by proximity to event, 'originality,' quality
- Information
 - Emphasis on richness, completeness, etc.
 - Enriched by linkage with other information
 - Enhanced by authenticity

Preserving an Electronic Record

Preservation of electronic records is the end-to-end process which enables reproduction of an authentic copy of the record

E-transactions

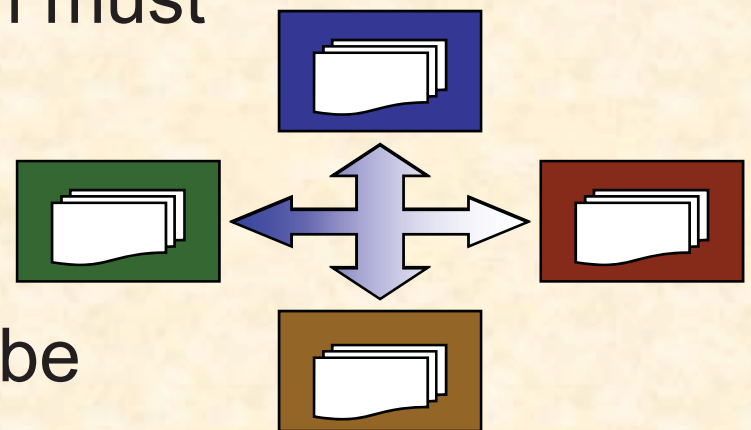

E-transactions: Basic Assumptions

- *Different* systems interact in e-transactions.
- The only thing one system needs to know about another is that it can use the same intermediary.
- Anything which must be true about an information asset in one system must be true about that asset in another system involved in the e-transaction.

Electronic Records Archives: Basic Assumptions

- The ERA system must be able to interact with ***different*** systems.
- At any time, the only thing the ERA system needs to know about another is that it can use the same intermediary.
- Over time, the ERA system cannot know what mediators other systems will use.
- Any record in the ERA system must be an authentic copy of that record.
- Any record delivered from ERA to another system must be an authentic copy.

NARA's Strategy

- Attack the critical preservation problem
 - Make information assets independent of information technology infrastructure
- Define the requirements in terms of the lifecycle management of records
- Find solutions in mainstream technologies being developed to support e-commerce and e-government
- Align with overall direction of IT in the U.S. Government

NARA's Response: The ERA Program

- System acquisition
 - The ERA system will
 - Support NARA's end-to-end lifecycle management of all records
 - Preserve and provide access to electronic records
- Organizational change management
 - Ensure NARA can successfully implement the system
- Research and Exploratory Development
 - Address new challenges posed by continuing change in IT and its use in government
 - Capitalize on opportunities offered by technological progress

Acquisition of the ERA System

- Release RFP: Current Quarter
 - Contract for Competing Designs:
 - Q 3 FY 2004
 - Select single developer
 - Q3 FY 2005
 - Initial Operating Capability:
 - FY 2007
 - Full Operating Capability
 - FY 2011

To Manage Electronic Records Efficiently and Effectively

- Automate processing
- Incorporate laws, regulations, policies, and sound archival and records management principles in the system.
- Make electronic records *self-describing* and *self-validating* to facilitate processing and management

CIRCULAR NO. A-119
Revised

MEMORANDUM FOR HEADS OF EXECUTIVE DEPARTMENTS AND AGENCIES

SUBJECT: Federal Participation in the Development and Use of Voluntary Consensus Standards and in Conformity Assessment Activities

Revised OMB Circular A-119 establishes policies on Federal use and development of voluntary consensus standards and on conformity assessment activities. Pub. L. 104-113, the "National Technology Transfer and Advancement Act of 1995," codified existing policies in A-119, established reporting requirements, and authorized the National Institute of Standards and Technology to coordinate conformity assessment activities of the agencies. OMB is issuing this revision of the Circular in order to make the terminology of the Circular consistent with the National Technology Transfer and Advancement Act of 1995, to issue guidance to the agencies on making their reports to OMB, to direct the Secretary of Commerce to issue policy guidance for conformity assessment, and to make changes for clarity.

Departments And Agencies</>

<Subject:>Federal Participation in the
Development and Use of Voluntary Consensus
Standards and Conformity Activities </> <

Message Body:>Revised OMB Circular A-119
establishes policies on federal use

Automated Controls: “Template”

- An abstraction or articulation of the properties of a record, set of records, or a transaction involving records, which must be controlled.
 - The template for all records requires that the provenance, date, and archival bond be specified.
 - The template for State Dept. diplomatic messages requires that all content be plain text.
 - The template for all transfers of records to the National Archives is the S.F. 258

Self-validating Electronic Records

- A **self-describing document** has meaningful indicators of what the document is and/or contains
 - Ideally, the indicators (“tags”) are simple and clear enough to be correctly interpreted by any computer or by a person
- When the tags can be used to compare a self-describing document to a model (“template”) of what it should be, it can be a **self-validating document**

Template Example

Document Type: Transmittal Memorandum

Document Date: February 10, 1998

Directive: CIRCULAR NO. A-119

Address: MEMORANDUM FOR HEADS OF EXECUTIVE DEPARTMENTS AND AGENCIES

Revised Status: Revised

Subject: Federal Participation in the Development and Use of Voluntary Consensus Standards and in Conformity Assessment Activities

Message Body: Revised OMB Circular A-119 establishes policies on Federal use and development of voluntary consensus standards and on conformity assessment activities. Pub. L. 104-113, the "National Technology Transfer and Advancement Act of 1995" codified existing policies in A-119, established reporting requirements, and authorized the National Institute of Standards and Technology to coordinate conformity assessment activities of the agencies. OMB is issuing this revision of the Circular in order to make the terminology of the Circular consistent with the National Technology Transfer and Advancement Act of 1995, to issue guidance to the agencies on making their reports to OMB, to direct the Secretary of Commerce to issue policy guidance for conformity assessment, and to make changes for clarity.

Author: Franklin D. Raines

- A "Transmittal Memorandum" must contain

Reference to the directive which it transmits

A subject header

Indication of addressees

Identity of the transmitting official

Date transmitted by the official

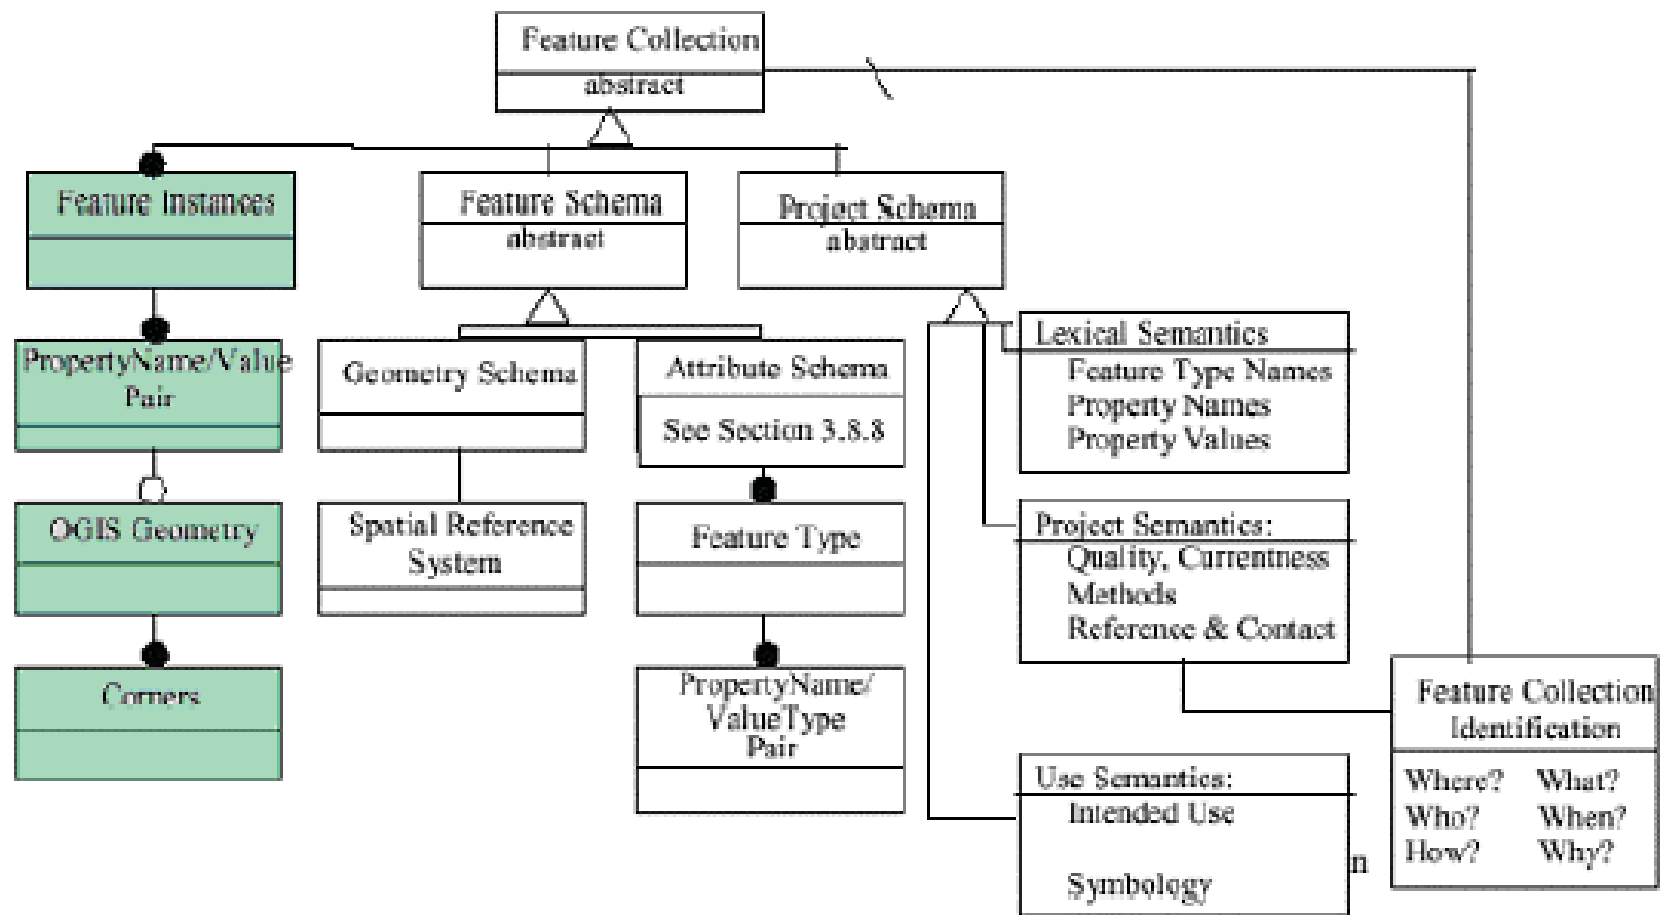

A message body

- The message body may identify the legal basis and one or more action officers

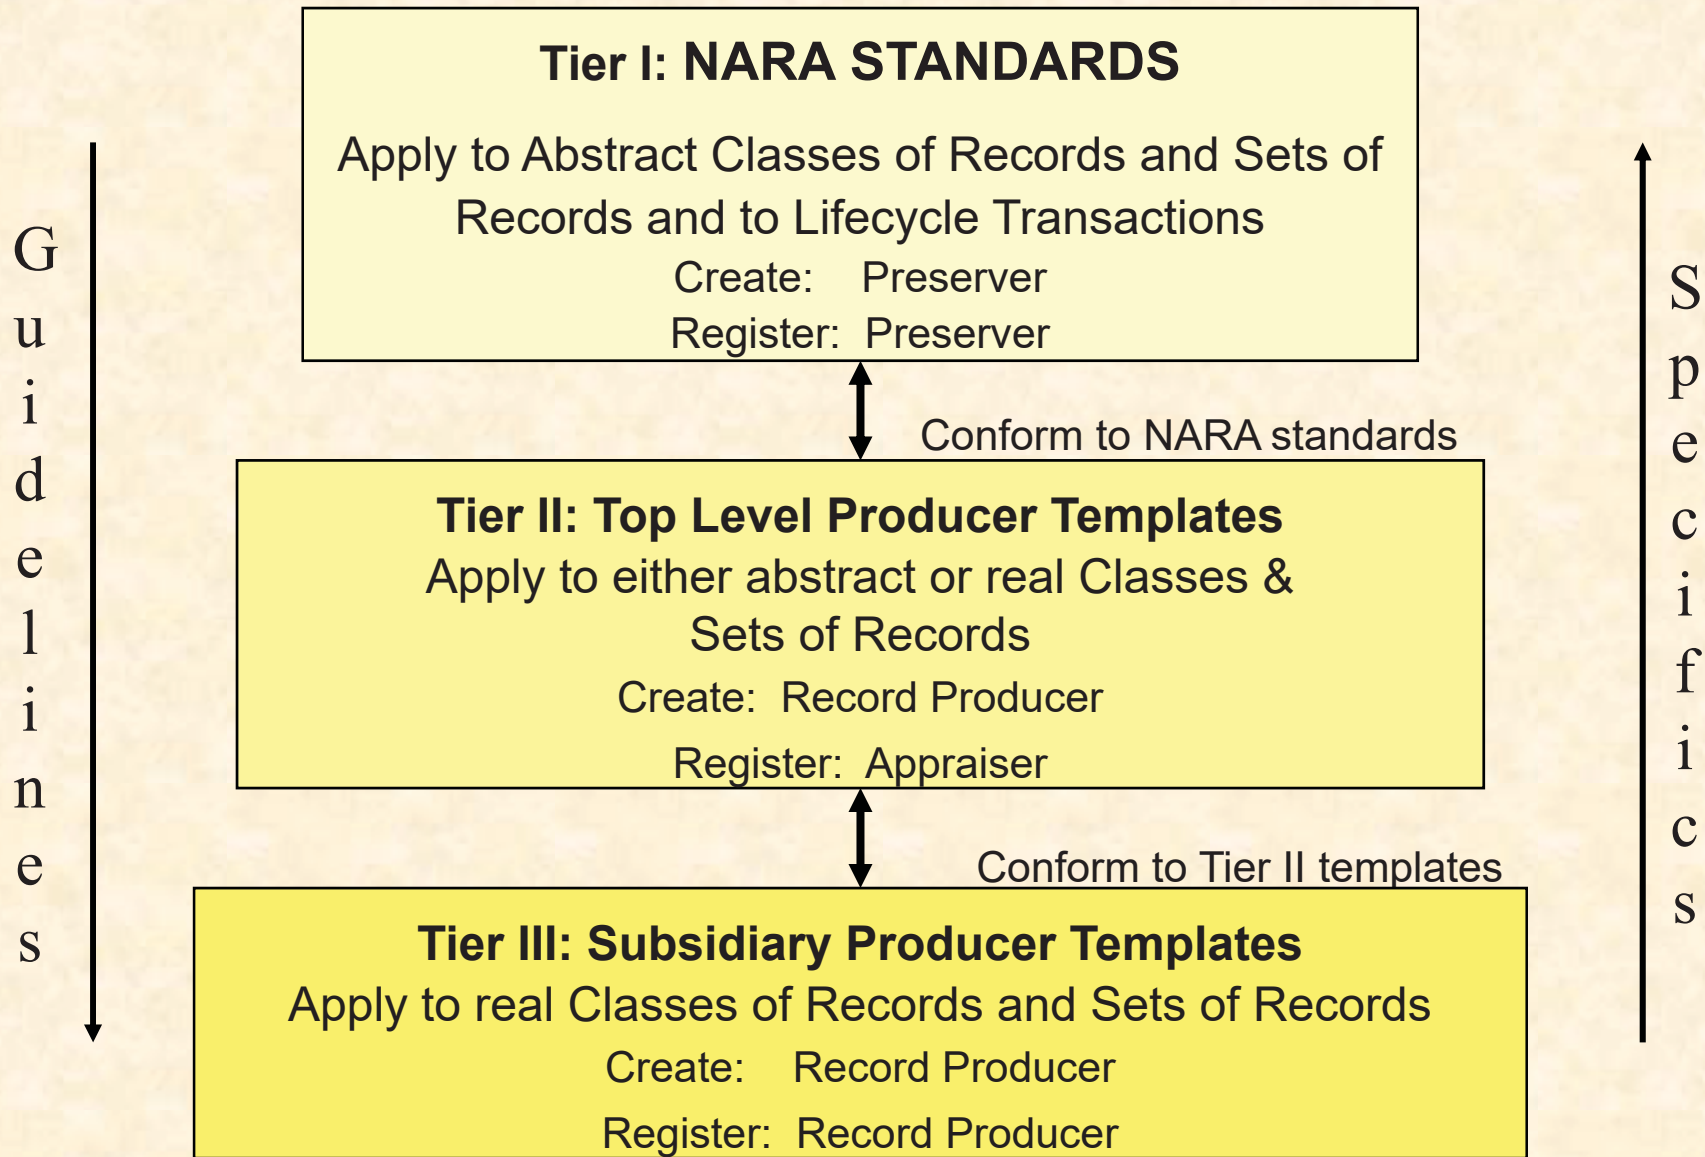

If the template is in executable form, the computer can determine automatically if a record is what it should be.
