

InterPARES 2 Project

International Research on Permanent Authentic Records in Electronic Systems

Modeling Cross-domain Task Force Objectives

To translate and describe the results of InterPARES 2 research into formal models to enable their verification and validation and to support (internal and external) communication and dissemination.

This objective will be achieved by:

- Developing an integrated lifecycle model of creating, managing and preserving digital records based upon the existing models of the UBC¹ and InterPARES 1² projects, and upon information coming out of the case studies in InterPARES 2.
- Developing a data-model based upon this integrated model.
- Validating developed models by carrying out walkthroughs with data from case studies.
- Supporting modeling activities done in case studies with respect to the business/creation process.

Members:

- Hans Hofman (chair), Babak Hamidzadeh, Bill Underwood, Ken Thibodeau, Luciana Duranti, Terry Eastwood, Paul Berkman, Rich Lysakowski

Participants:

- Michael Skipper (NARA), Nadav Rouche (UCLA)
