

SIRM in RUC Leading the TEAM China of InterPARES 3

Time:2007-1-18 0:55:55

InterPARES (The International Research on Permanent Authentic Records in Electronic Systems) began its third phase research just now. Ten countries joined InterPARES 3 project with the main goal to put the previous rich research outcomes into practice and do further evaluation and improvement, to help various agencies build their own electronic records management systems based on authentic records and establish related regulations, guidelines, training patterns and so on.

Invited by Dr. Luciana Duranti, director of InterPARES Project, Professor Feng Huiling, Dean of SIRM was engaged as special consultant of InterPARES team China and Professor Wang Jian as Director of InterPARES team China. On January 8-9, 2007, Prof. WANG Jian attended the January InterPARES 3 grant International Team Directors meeting in Vancouver, British Columbia, Canada and had warm discussions with directors from Canada, US, Britain, Holland, Brazil, Mexico, China, South Korea and so on.

Participated by international experts, InterPARES (www.interpares.org) integrated experience of many outstanding test-bed results and formulated a series of principles, guidelines, templates, models and functional requirements of electronic records management. In line with the objectives and goals of the next step, InterPARES 3 will also commit in providing training materials and methods for participated institutions of universities, professional associations, training institutions, various kinds of users for the deeper understanding of InterPARES research outcome and its application into practice. These valuable resources and results will be available to the InterPARES 3 team members and collaborators, the institutions and individuals involved in the project would have great influence at home and abroad and benefit a lot from this project.
